It's advice from someone who not only has had great success as an investor, but also seen more of the world than anyone else.I like Jim Rogers' advice and anecdote on being a self-starter. It's something I think about from time-to-time when I feel like I have nothing to do. I have begun studying Mandarin (as

he recommends). If he's right about China, which I think he is, then anyone who can speak the language will have a huge competitive advantage going-forward. I also appreciate the fact that he thinks studying history and philosophy are worthwhile. It's nice to know that someone as accomplished as himself appreciates a degree that's not business. As much as I enjoyed this books, I'd like to give a heads-up that this books is nowhere near as good as Adventure Capitalist, Rogers' book on his adventure traveling the globe (and one of my all-time favorite books). However, it is still a fantastic read and gives you lots of food for thought. Highly recommended! 0 of 0 people found the following review helpful. Four Stars By bargin hunter excellent book. like it a lot.

When I was a boy, my father often pulled me aside to convey lessons intended to build what we generally refer to as "character". Often his advice was very simple mdash; work hard, think for yourself, do right by others mdash; but I believe those lessons provided the foundation for everything that has followed in my life. Now that I'm a dad myself, I wanted to put them down in one place, with examples of my own experiences, as a guide to life, adventure, and investing, both for my young daughters and for anyone seeking success in his or her chosen field. I hope that parents will be inspired to give this book to their children, and vice versa, as many of the lessons that I have learned apply not just to young people but to all adultsmdash;for example, question everything, never follow the crowd, and beware of boys! What a lovely, lovely book! Though I've read all you've written, this one really touched me. nbsp; It is, of course, a love letter to your daughters, which is not only a wonderful, meaningful thing to do, but it was filled with exactly the kind of advice all fathers should give. Your new book will stay on my shelf for a long, long time, and I'll be giving it to my own kids to read. --Nicholas Sparks, author of The Notebook, Dear John, and The Last Song

From Booklist Legendary investor Rogers cofounded the Quantum Fund with George Soros in 1970, retired at the age of 37 in 1980, and spent a number of years traveling through China and six continents by motorcycle. He recently fathered two daughters in his sixties and wrote this small memoir to share with them some of the insights that he has garnered from his experiences. He advises to make your own decisions in life rather than listening to others, to figure out what you love to do and focus on that rather than what is expected of you, and to have a dream and to live your dream. In the area of finances, he says to save and invest early on rather than spending frivolously, so that you will be able to afford the important things in life later, and to do your own research, draw your own conclusions, and look to the futuremdash;not the pastmdash;for great ideas. These and other nuggets of wisdom from this self-made man are worth reading several times over. --David Siegfried Praise for A GIFT TO MY CHILDREN Hey Jim! What a lovely, lovely book!
