Daniela Roettger : Agricultural Finance for Smallholder Farmers: Rethinking Traditional Microfinance Risk and Cost Management Approaches (University Meets Microfinance) before purchasing it in order to gage whether or not it would be worth my time, and all praised Agricultural Finance for Smallholder Farmers: Rethinking Traditional Microfinance Risk and Cost Management Approaches (University Meets Microfinance):

Even though traditional microfinance has successfully paved the way for offering financial services to low-income populations without traditional collateral, many microfinance institutions (MFIs) are still reluctant to move into rural areas and agricultural finance, due to the perceived high risks and costs. Daniela Rouml;ttger's research demonstrates how MFIs can mitigate risks and costs of lending to smallholder farmers by using a combination of proven traditional microfinance mechanisms while adapting specific loan features and lending mechanisms to the particularities of smallholder agriculture. She systematically compares traditional microfinance risk management mechanisms with agricultural microfinance approaches and identifies successful strategies. For this purpose, eight MFIs providing agricultural finance to smallholder farmers in four countries in East and West Africa (Uganda, Kenya, Benin, Cameroon) were interviewed and their loan features and agricultural lending mechanism were analyzed. The study shows that MFIs can successfully serve smallholder farmers in rural areas. However, the extent of adaptations is reason enough not to commit to such an endeavor lightly. A strong commitment combined with sound in-house knowledge of agricultural value chains and the flexibility to adapt loan terms and lending procedures to the particularities of agriculture are needed to successfully develop and sustain agricultural microfinance.

This book is a concrete example of how very good practical, field-based research can help practitioners and the sector in general to better understand some of their key challenges and to open new opportunities for development and innovation. (Philippe Guichandut, Head of Development and Technical Assistance at the Grameen Creacute;dit Agricole Microfinance Foundation) About the Author Daniela Rouml;ttger won the 2013 University Meets Microfinance award. She works as an independent consultant for microfinance and monitoring evaluation, including the Competitive African Cotton Initiative.
