Race teams are some of the most high performance teams there are. If they don't work well they often don't finish the race, so taking tips based on race car teams seems silly but it actually

works. This book is a quick read with practical tips that you can start implementing right away. If you aren't ready to implement change in your organization it give you a road map of how to achieve it. One of the most valuable pieces of information is on hiring the best people for your company and how to keep them. Making sure that your future leaders are trained and know what they are getting into and what is expected of them and how to move your company forward so that it stays relevant. I was glad I was given this book to read because it gave me some valuable information that I can use to move my company forward. I might not have picked it up if I hadn't been assigned it.1 of 1 people found the following review helpful. Valuable info presented in a great model everyone can understandBy Big Jeff in AtlantaObviously a business leader has to meet financial objectives - but if they want to sustain their business, and leave a positive legacy - they need to pay attention to the 10 point checkup described in Dr. Goldner's new book.Using the metaphor of the car, everyone will be able to understand the important points. Leaders who take them seriously (and act accordingly), will be able to improve the performance of their organization.The book is a quick read, and contains a valuable assessment readers can take as they read the book. The assessment is an excellent way to identify areas that could benefit from improvement, and forms a great basis for a conversation with a consultant.2 of 2 people found the following review helpful. A "MUST HAVE" IN TODAY'S BUSINESS WORLD!!By Greg GAs a reader of an advance copy, I found this book to be a practical toolkit. As a leader in my company, I took away many actions that I've already begun implementing to help my business in this economy.

In *Driven to Success*, leadership and business crisis expert Jane Goldner, PhD, explains that the creation and maintenance of a healthy, cohesive and successful company depends on the leadership's willingness to regularly look under the hood and assess what's working, what needs improvement and what innovations can be made to take the company to the next level of success. Why search under the hood? Because being proactive produces far better results than being reactive. *Driven to Success* is a step-by-step guide designed to help business leaders propel their organizations to the next level of high performance. The book's 10-Point Checkup allows readers to evaluate their actions at a glance and hold colleagues and employees accountable for doing the same. Dr Goldner's Business Operating System Solution for Enterprise Results (BOSS) helps build internal alignment across the company and through all systems which is required to attract, develop and retain talent on the road to becoming highly successful.
