**D. Fudenberg, J. Tirole : Dynamic Models of Oligopoly: Volume 2 (Fundamentals of Pure and Applied Economics)** before purchasing it in order to gage whether or not it would be worth my time, and all praised Dynamic Models of Oligopoly: Volume 2 (Fundamentals of Pure and Applied Economics):

The body of theory coming out of that era was far from perfect and it had no immediate quantitative use. Nevertheless, those of us who wish to

continue the development and application of dynamic oligopoly theory would do well to study Fudenberg and Tirole's monograph. 0 of 1 people found the following review helpful. One Star By Taewan Kim Book was delivered with severe folded condition. Very unhappy. :(

Fudenberg and Tirole use the game-theoretic issues of information, commitment and timing to provide a realistic approach to oligopoly.

About the Author Jean Tirole is chairman of the board of the Jean-Jacques Laffont Foundation at the Toulouse School of Economics, and scientific director of the Industrial Economics Institute (IDEI) in Toulouse. He was awarded the Nobel Prize for Economic Science in 2014.
