has been an amazing source for my 6/7/8th grade English classes. I have some students who are avid readers and motivated writers, and I am using this source to diversify my writing lessons. With little incursion on my lessons, these students can independently explore and attempt writing styles that stretch their natural talent to more sophisticated levels. As far as the rest of the class is concerned, I am able to use strategies I uncover working with the advanced writers to get these students more engaged, as well. I had used mentor texts before, but using the classic writers is brilliant in this context. It is very heartening to see teenagers so excited and encouraged by the success of their writing efforts. I highly recommend *The Writer's Workshop* to teachers from middle school through college level. It is so easy to implement that it almost teaches itself! Thanks, Professor!

By BEI have believed in the imitation process of education for a long time but have been hard pressed to find agreeable curriculum. This book is an excellent resource and starting point for teaching writing through imitation. I believe it was written from the author's experience of teaching college level courses, but it could be used in middle or high schools (and especially homeschools) with some adjustments. I can't wait to try these lessons during the next school year.

The history we can't afford to forget. At last, the definitive history of supply-side economics—an incredibly timely work that reveals the foundations of America's prosperity when those very foundations are under attack. In the riveting, groundbreaking book *Econoclasts*, historian Brian Domitrovic tells the remarkable story of the economists, journalists, Washington staffers, and (ultimately) politicians who showed America how to get out of the 1970s stagflation and ushered in an unprecedented quarter-century run of growth and opportunity. Based on the author's years of archival research, *Econoclasts* is a masterful narrative history in the tradition of Amity Shlaes' *The Forgotten Man* and John Steele Gordon's *An Empire of Wealth*.
