**Arturo Escobar : Encountering Development: The Making and Unmaking of the Third World** before purchasing it in order to gage whether or not it would be worth my time, and all praised Encountering Development: The Making and Unmaking of the Third World:

0 of 0 people found the following review helpful. Four StarsBy MAGA classic text improved with the new introduction.1 of 1 people found the following review helpful. Great book to Understand What a Eurocentric

"Development" Truly is By karim bataneh great book, the author is makes extremely elaborate yet easy to understand points. Anyone looking to be involved in the world of development in any way should read this book. You do not have to agree with the author, but at least be aware of the pitfalls of development that he maps out. and at the very least answer to them. 0 of 0 people found the following review helpful. Sound Academic Text on Post Development By Kimberley Morgan Very sound text on post development. It provides introspection into the field of development and suggests an alternative to this, hence the making of the post development theory.

How did the industrialized nations of North America and Europe come to be seen as the appropriate models for post-World War II societies in Asia, Africa, and Latin America? How did the postwar discourse on development actually create the so-called Third World? And what will happen when development ideology collapses? To answer these questions, Arturo Escobar shows how development policies became mechanisms of control that were just as pervasive and effective as their colonial counterparts. The development apparatus generated categories powerful enough to shape the thinking even of its occasional critics while poverty and hunger became widespread. "Development" was not even partially "deconstructed" until the 1980s, when new tools for analyzing the representation of social reality were applied to specific "Third World" cases. Here Escobar deploys these new techniques in a provocative analysis of development discourse and practice in general, concluding with a discussion of alternative visions for a postdevelopment era. Escobar emphasizes the role of economists in development discourse--his case study of Colombia demonstrates that the economization of food resulted in ambitious plans, and more hunger. To depict the production of knowledge and power in other development fields, the author shows how peasants, women, and nature became objects of knowledge and targets of power under the "gaze of experts." In a substantial new introduction, Escobar reviews debates on globalization and postdevelopment since the book's original publication in 1995 and argues that the concept of postdevelopment needs to be redefined to meet today's significantly new conditions. He then calls for the development of a field of "pluriversal studies," which he illustrates with examples from recent Latin American movements.
