By Roger E. BreischI'm not that bad...am I? Joe Abraham recently gave a presentation at an entrepreneurial forum at Waubensee Community College. A number of fellow Chamber members were there, bought his book and read it before I had a chance. Most of them told me how much they liked it but added something like, "You won't like it Roger, it's not nearly deep enough for you." Well, I actually do like this book. I like it a lot. It's readable, practical and insightful. So there!
Joe's premise is that it's not useful to refer to a person simply as an entrepreneur. Not only is it unhelpful, it can be hurtful or even dangerous. Joe developed a matrix and on-line survey that teases out what he calls an entrepreneur's DNA--important characteristics of very different types entrepreneurs. The matrix is called BOSI for the Builder, Opportunist, Specialist and Innovator DNAs that define the matrix's four quadrants. Your personal DNA is typically made up of one primary and one secondary strength. What is useful is that Joe gives each type of entrepreneur practical advice on how to use their strengths, how to know and minimize their weaknesses, and, perhaps most importantly, which other types of entrepreneurs make their best business partners. It turns out that Innovators are probably the most intellectual, abstract thinkers of the group. I scored near 100% in the Innovator quadrant...maybe I am that bad after all!

By William T. Howard I really enjoyed the unique perspective offered in "Entrepreneurial DNA". It is full of fresh, common sense ideas about what makes what makes each entrepreneur tick and how these same unique qualities can ultimately become roadblocks to growth if not identified and compensated for. Understanding your own and your team's DNA can expose new opportunity and help every entrepreneur develop a better strategic roadmap to growth and profit. The book also does a great job of offering a blueprint for tactical

implementation of the principals it reveals, something rarely accomplished in business books. One of the best business reads I've had since for "e-myth".

After all, nobody would put Donald Trump, a multilevel marketer, and the owner of a local pizza parlor in the same category. Everyone possesses unique entrepreneurial DNA—and discovering yours is the critical first step to success. To help you build a successful business or optimize results within your current business, serial entrepreneur and business strategist Joe Abraham has developed the BOSI system—a simple, structured process for determining your own entrepreneurial tendencies, strengths, and growth areas. With the BOSI system, you can create a strategic plan mapped to your entrepreneurial DNA that will improve all aspects of your business and leadership journey. Abraham's system provides four entrepreneurial categories that people fall into. Which type of entrepreneur are you? Builder: Strategic, always looking for the upper hand Talent: creating scalable business ventures Opportunist: Speculative, always in the right place at the right time Talent: making money fast Specialist: Focused, in it for the long term Talent: providing exceptional client service Innovator: Inventive, with a desire to make an impact Talent: creating game-changing products At least one of these four categories describes you—or perhaps a combination of two. Learning what type of entrepreneurial DNA you possess is critical to how you should structure and deploy your game plan in business. Whether you're serious about becoming a successful entrepreneur or improving your existing business, start with Entrepreneurial DNA.
