Lawrence B. Cahill, Raymond W. Kane : Environmental Health and Safety Audits before purchasing it in order to gauge whether or not it would be worth my time, and all praised Environmental Health and Safety Audits:

1 of 1 people found the following review helpful. Do Not Buy The Kindle Version!!!!By JthomasKindle version of this text book is worthless. There are no page numbers at all! If you are using this book for a master's course or any class, the kindle version will not work for you. They should have stated this up front in the description, now I have to wait for the hard copy of the text book to be delivered, all the while my class goes on...., you should be all over this!0 of 0 people found the following review helpful. Kindle Version SubparBy SC22While the text itself was great, the kindle version is lacking. For whatever reason there are no page numbers and there is no table of contents I can use to skip to a chapter or page. I end up having to flip through pages and try to make my own book marks just to jump to a

different chapter. The lack of page numbers also makes it very difficult to cite the text in my papers. Typically I prefer to have an electronic text book, but this time around I wish I had just ordered the physical copy. 0 of 0 people found the following review helpful. Five Stars

Great information if you're looking to design an audit or improve an existing program

This new edition of Environmental Health and Safety Audits not only will help you put your company on course toward effective environmental compliance, but also now brings you up to date on changes in EPA and OSHA auditing policies, issues currently confronting auditing programs, and state-of-the-art strategies for managing and conducting audits. In this book, author Lawrence B. Cahill, a veteran with over 25 years of industry experience, provides all the information needed to conduct audits and manage an EHS auditing program. He discusses new developments in information generation and availability, including ISO 14000 auditing guidelines, auditing dilemmas, and auditing tips. He provides several tools for building a successful audit program, including an EHS audit program manual, a pre-audit questionnaire, a pre-audit checklist, an EHS audit opening conference presentation, an environmental audit report, an EHS audit appraisal questionnaire, and a management report. In addition to updates to most chapters, several new chapters address conducting third-party evaluations, and include a number of quick, practical reference guides on all aspects of performing an EHS audit, from preparation to reporting findings. A new appendix also models a conference closing presentation.

About the Author
Lawrence B. Cahill is a Certified Professional Environmental Auditor with Master Certification, and a Principal in ERM's Business Integration Group in Exton, Pennsylvania. He has over twenty-five years of professional EHS experience in industry and consulting. Mr. Cahill has worked for Fortune 500 companies such as DuPont, Exxon, BF Goodrich, Colgate-Palmolive, Hercules, Eastman Kodak, Occidental Petroleum, Bristol-Myers Squibb, and TRW. He has conducted hundreds of audits, and has trained thousands of people in auditing skills all over the world, from Asia and Africa to South America, and throughout Europe and North America.
