MKT 3605 class in content marketing. Believed by many as THE expert in content marketing, Joe provides a comprehensive instructional guide on how to adopt an effective content driven marketing organization in a growing world of info-besity. The book, in my opinion, qualifies academically as a primary reading for undergraduate level courses and a supplementary reading for MBA level courses. The recommendation is based on the following: 1) Joe has extensive experience as a marketer and social media influencer for major brands. His company, Content Marketing Institute, is heralded for its leading edge podcasts, blogs and world renown conferences devoted to the subject of content marketing. 2) The book provides a solid case for how content should drive our sales funnel efforts. 3) Using content marketing as the center of a new wave of marketing, Joe effectively captures why storytelling, influence and the development of subscription-based audiences are redefining the way we market ourselves. 4) The book is perfectly organized for a course on content marketing adoption. Starting with the rationale for adopting a content intensive strategy, the book progresses through the content creation process, descriptions of what content works well and how to leverage social media for content exposure. It concludes with the highly demanded subjects of measurement, staffing and content planning. 5) The book has an exhaustive list of examples on the effective use of content by well known brands. 6) Joe's humorous style turns a dry and detail oriented subject into a fun read. It fits his orange suit persona that can pack an audience at key conferences.

Marketers have much less of a captive audience to shout at because modern technology helps people avoid unwanted, interruptive marketing messages. So now, instead of interrupting what people are interested in, you have to be what people are interested in. That's why Seth Godin maintains that "Content marketing is the only marketing left." This book covers the history of content marketing, which is actually a pretty old form of marketing that is now going through a resurgence. It shows you how to define your marketing niche and content strategy. And it walks you step by step through the process of developing content that informs, entertains and compels action. But it also includes how to measure your content marketing in order to improve it. And it has lots of great examples and case studies. It truly covers the content marketing waterfront. It's a tour de force. It's ...epic. And that's why Fortune Magazine named it as one of "Five Must Read Business Books." If you are new to content marketing or want to read just one book about the topic to get real, smart real fast, this is your book. Joe's friends and supporters; those who like the book and one who doesn't supported by twenty plus people who found his opinion helpful. If one reads the reviews in order to determine whether or not to buy the book, how does she sort through all of this? To begin with, John Gibbs, Sarah Mitchell and Jon Wuebben's reviews here are solid and stone cold nail the question: What's this book about? I have no skin in the game. I don't know Joe and I'm not involved in Content Marketing. My interests are in marketing, storytelling and the art of communication. So why did I buy Joe's book? Because other authors whose opinions I value, talk highly of Joe's work. Now these authors aren't management and leadership writers, they are Joe's competitors. In Epic Content Marketing, Joe talks about them as well. The fact that these authors are on the same page, squares value for me. It broadens the degree in which I am able to get my mind around Content Marketing and it enriches my overall learning experience. It also speaks volumes of Joe as a businessman, teacher and person. That's why I bought it.
