high kid could understand it with no problem) and not too dry (written in a clear and engaging style). It contains a lot of interesting information and some great maps. This would be a great book for your kid if you're home schooling him/her. Also, adults will probably like it too; it really gives you a rough feel for the world around you without overwhelming you with too many obscure facts. If you're some well traveled worldly type, it will probably be stuff you already know, but if you're a typical simple person like myself, it is a great book and you'll learn a lot from it.1 of 1 people found the following review helpful. Aimed at business students preparing to enter the workforce, Leadership and Mindful Behavior provides readers with guidelines for effective and perceptive leadership. Some of the aspects to be reviewed will be the importance of both soft and hard skills; the concepts of sleepwalking and wakefulness; mental models, respect, change, and compassion.
