David Broadbent : Learning to Run: A Guide to Business Process Re-engineering before purchasing it in order to gauge whether or not it would be worth my time, and all praised Learning to Run: A Guide to Business Process Re-engineering:

David Broadbent presented a number of theories round a case study at the OMG 'BPM Think Tank' in November 2008 in Putten, Netherlands. The main points were that lots of organisations suffer from some or all of the following: bull; No Cross-functional communication or co-operation. bull; No understanding of the end-to-end process bull; No ownership of the end-to-end process bull; Blame culture bull; Silo mentality bull; Resistance to change bull; Lack of process capability maturity to actually implement change A number of those present suggested that David put his

theories on culture being seen as an afterthought into a book.
