I hate doing them, but someone recommended this book and I was tired of our accountant being Ultra Conservative and not getting us all our write-offs we deserved running our business. Last year we paid taxes and this year we got that same amount BACK to us, just because of this book. It's in laymen's terms, gave great examples for each scenario he lines out and gives a great breakdown of the various areas anyone can benefit from. Biggest lesson for us was: CLAIM USE 2 cars for miles. You get a lot extra in write-offs with mileage for business miles because one is based on 100% of the per cent rate on one car and then the business amount for the other car.Must read! I skimmed the areas in under 1 hour for what

we needed to know. It made me feel a lot more confident walking into our accountants office and asking him to write certain items he wouldn't have suggested in the past, off.6 of 6 people found the following review helpful.
