Not for those who use the standard deduction. Liked it so much I ordered 2 more copies for my kids who are going into business themselves.0 of 0 people found the following review helpful. US Taxes and the Magic of CompoundingBy Eman NepA quick story: While discussing the then ongoing 2016 US presidential election, the Texas oilman seated next to me during my flight home told me that

the US tax code helped business people make money (basically at the expense of the typical W-2 employee). In fact, while laughing a bit, he told me that I'd never get any tax breaks as a W-2'er. I appreciated the conversation. So, fast forward a few months...The book is a concise and comprehensive overview of "little things" that can collectively add up to substantive savings for the average American tax subject. The book is well laid out, accessibly written, contains citations to relevant IRS Code and Tax Court cases. However, it isn't dry or overwhelming. That said, having read and/or review other materials, I know that the book is not all-encompassing (and I don't believe that it's intended to be). Mr. Botkin makes a clear case for what the oilman told me on the plane, FOR THOSE IN BUSINESS, there are plenty of ways to benefit from the US tax code. Having read others' reviews of this book, I say many complained that the book is written for business people. I'd say that those people missed the implicit lesson of the book, which is get engaged in a business so that you can benefit like everyone else who has already figured things out. In summary, at \$6.99, this was a fantastic purchase that not only helped me map out/ connect disparate ideas and knowledge from other sources, but also revealed aspects of the Code of which I wasn't aware. I wish I'd known about the book much sooner. 10 of 11 people found the following review helpful. Save a lot of money. By Emma LAN interesting book that helps you save money like the rich. The way is by saving a lot of money on taxes. All you have to do is setup a corporation. My LLC cost \$150. Then just follow the simple to use advice.
