McConnell : Macroeconomics (Irwin Economics) before purchasing it in order to gage whether or not it would be worth my time, and all praised Macroeconomics (Irwin Economics):

0 of 0 people found the following review helpful. Great book. I used it for my Macro classBy LTHGreat book.I used it for my Macro class. The book is very accurate and teaches a lot about the basics of economics.3 of 3 people found the following review helpful. MacroeconomicsBy Vernon NormanThis book is incredibly straightforward and easy to read and understand. Stanley Fisher and company provide excellent examples for each of the fundamental models and also show how models and theory are connected to real world policy situations. I recommend this textbook, even if you're not an economics major.0 of 0 people found the following review helpful. Love it.By Sheila CherizardLove it. Love it. Love it. I appreciate the online book, study materials, and quiz portion, as well. The book is informative, more instructive for degree seeking students.

NOTE: This book is a standalone book and will not include access code.McConnell/Brue/Flynn has long set the standard for providing high-quality content to instructors and students all over the world. It has remained the most widely used principles of economics product as a result of persistent innovation.

About the Author Sean is an assistant professor of economics at Scripps College in Claremont, California. He is the author of the international best seller "Economics for Dummies" as well as the coauthor, along with Campbell McConnell and Stanley Brue, of the world's best-selling college economics textbook, "Economics: Principles, Problems, and Policies". An avid martial artist, Sean is a former Aikido national champion and has coached five of his students to U.S. national aikido titles. A recurring commentator on FOX Business, ABC News, and NPR, Sean holds a B.A. in economics from the University of Southern California and a Ph.D. in economics from U.C. Berkeley, where he completed his dissertation under the supervision of Nobel Laureate George Akerlof. Sean's research focuses on the often puzzling and seemingly irrational behavior of stock market investors, but he's also investigated topics as wide-ranging as the factors that affect customer tipping behavior at restaurants and why you see a lot of unionized workers only in certain industries.
