Kelvin Lancaster : Mathematical Economics (Dover Books on Computer Science) before purchasing it in order to gauge whether or not it would be worth my time, and all praised Mathematical Economics (Dover Books on Computer Science):

Graduate-level text provides complete and rigorous expositions of economic models analyzed primarily from the point

of view of their mathematical properties, followed by relevant mathematical reviews. Part I covers optimizing theory; Parts II and III survey static and dynamic economic models; and Part IV contains the mathematical reviews, which range from linear algebra to point-to-set mappings.
