The Open Group : TOGAFreg; Version 9.1 (TOGAF Series) before purchasing it in order to gage whether or not it would be worth my time, and all praised TOGAFreg; Version 9.1 (TOGAF Series):

IrwinI've read a lot of standards in my day and this has to be one of the worst (and no I don't buy that they're all bad, I've read well written/readable standards). Very unreadable.If you're going to take the test I recommend buying the 2 study guides (one for each test). Not sure this is even worth reading for the test. I really don't think it helped me at all.1 of 1 people found the following review helpful. As Standards go ... not badBy Rob WolfeDry, not exciting... it is a standard for goodness sake what do you expect.Very clear and does a good job though.would be nice if there were more standardized templates but that isn't the book's fault.1 of 1 people found the following review helpful. Fonts Too small

to read for long timeBy Murali Manohar+ : The content is very extensive and has abundant information on Enterprise Architecture. Its nicely structured and organized .-: The fonts are too small and it gives much stress to eyes. Its better to read free online version <http://pubs.opengroup.org/architecture/togaf9-doc>.Hence rating with 3 star.

TOGAF is a framework - a detailed method and a set of supporting tools - for developing an enterprise architecture, developed by members of The Open Group Architecture Forum. TOGAF Version 9.1 is a maintenance update to TOGAF 9, addressing comments raised since the introduction of TOGAF 9 in 2009. It retains the major features and structure of TOGAF 9, thereby preserving existing investment in TOGAF, and adds further detail and clarification to what is already proven. It may be used freely by any organization wishing to develop an enterprise architecture for use within that organization (subject to the Conditions of Use). This Book is divided into seven parts: Part I - Introduction This part provides a high-level introduction to the key concepts of enterprise architecture and in particular the TOGAF approach. It contains the definitions of terms used throughout TOGAF and release notes detailing the changes between this version and the previous version of TOGAF. Part II - Architecture Development Method This is the core of TOGAF. It describes the TOGAF Architecture Development Method (ADM) a step-by-step approach to developing an enterprise architecture. Part III - ADM Guidelines Techniques This part contains a collection of guidelines and techniques available for use in applying TOGAF and the TOGAF ADM. Part IV - Architecture Content Framework This part describes the TOGAF content framework, including a structured metamodel for architectural artifacts, the use of re-usable architecture building blocks, and an overview of typical architecture deliverables. Part V - Enterprise Continuum Tools This part discusses appropriate taxonomies and tools to categorize and store the outputs of architecture activity within an enterprise. Part VI - TOGAF Reference Models This part provides a selection of architectural reference models, which includes the TOGAF Foundation Architecture, and the Integrated Information Infrastructure Reference Model (III-RM).

A quality hard copy of the TOGAF method - easier to read than endless htm docs or huge pdfs!
