By Shirley Harris-Slaughter
I have to say this book was easy to read but not always easy to follow through on suggestions. Very helpful information but I never got through to the end of the book. Its good to refer back to if you have questions. This book is for the person who is really serious about self promotion on the internet. Then you can get what you need out of this book. The author writes in a clear and understandable fashion.

How to Create a Viral Explosion
By M. C Purdy
Peggy McColl's "Viral Explosions" provides a very general overview on how to create a brand and launch information products on the internet. The 2 main "secrets" for creating a viral explosion that are revealed in this book are that you should use affiliates and time all your marketing activities so they hit at/near the same time for maximum impact. If your reaction to this is "duh", then this book will probably be too basic and not worth the purchase price for you.
On the positive side, this book is short, easy to read, and low cost, so it's not a complete waste of money. I gave it 3 stars because I believe the 5 star reviews for this book were posted by friends of the author. There is nothing wonderfully revealing or particularly actionable in this book except for 2 sample emails that can be used for recruiting affiliates. It's definitely NOT a 5 star book. Anyone looking for step-by-step instructions or guidance will have to buy one of the author's high priced info products.

By Lori A. Miller
After hearing Peggy McCall on several radio shows, I admired her enthusiasm for marketing on the net. However, there was barely anything in the book that was not mentioned in her radio interviews. I was very disappointed, and felt I was duped out of the cost of the book. The thing is, she is such a good promoter that she got me to buy the book which I rarely do when I hear someone interviewed on the radio about their new book.
