Punam Chuhan-Pole, Manka Angwafo : Yes, Africa Can before purchasing it in order to gage whether or not it would be worth my time, and all praised Yes, Africa Can:

0 of 0 people found the following review helpful. Thorough and usefulBy Kindle CustomerThis book is a must-read for anyone who is serious about understanding how things really work in Africa. The chapters are complete and detailed. The book and the papers are organized in a way that makes it easy to find information and locate primary sources. Best of all, the examples are very current and highly focused on real-world examples. In an era when we still get nothing but bad news from the popular press about Africa, it's encouraging to see a book that focuses on the positives that exist, but without sugarcoating the challenges that businesses face.If you are in the corporate world, a private-sector investor, a DFI or an NGO, please read this book. It will help you make better decisions, while considering all of the issues at hand.I hope the World Bank re-issues an updated version of this book on a regular basis.0 of 0 people found the following review helpful. ThanksBy Rama Salim RichaReceived in good order

Drawing on the existing knowledge of African development from previous publications, *Yes Africa Can: Success Stories from a Dynamic Continent* takes an in-depth look at 26 economic and social development successes in Sub-Saharan African countries—twenty from individual countries and six that cut across the region. These stories manifest at the project, provincial, sub-national, national, or regional level and across themes, programs, and sectors. The book aims to address how Sub-Saharan African countries have overcome major development challenges. The main components of each case study include: (i) a description of the achievement and the elements that qualify the outcome as successful; (ii) an assessment of the main policies, interventions, actions, and other factors that contributed to the positive outcome; (iii) a presentation of the lessons learned and the contribution to the discourse on African development; and (iv) insights on the usability or applicability of the achievement in terms of the potential for scaling up the interventions and actions. Individual case studies also examine the role of the key stakeholders—the government, donors, or private investors—in facilitating and promoting the achievement. The studies are classified into four categories: overcoming or avoiding massive government failure, rebuilding or creating a government, rationalizing government involvement in markets, and listening to the people.
